TRAINING & CONSULTING

Dr. Oliver Hauss

*"I was impressed to see how Oliver could take any unfriendly looking set of data and transform it into an engaging, memorable, easy to understand presentation. He brings together competencies in data analysis, information processing and effective communication. If you have a lot of information that you want to communicate effectively or train people to develop these skills then I would highly recommend Oliver as a consultant and trainer."*

*"I attended Oliver's workshop called "There's No Such Thing as a Dry Subject". I work as a coach and a trainer so I must admit that I already knew a lot of things about presentations and how to engage an audience BUT Oliver totally surprised me! He delivered such a valuable content about how complex topics can inspire rather than overwhelm the audience. I found his tips so useful in my job and I've definitely seen the results! Thank you so much Oliver for your clarity, competence and well balanced irony!"*
